STRETCHABLE AND SHRINKABLE TREE LIGHT STRINGS

ABSTRACT

A stretchable and shrinkable tree light string including: long trunk: composing of many short pipes, the short pipes having one or many connecting ring; base frame: having the central axis to support long trunk to stand up right straight; multiple branches: connecting one end of pin with the connecting ring on the short pipe, to use the connecting ring as base point, the other end of branches being the center of the long trunk to be able to stretch out to form a tree shape, also to be able to fold up to reduce the volume; single or many sets of light string: composed of many lamp bulbs, lamp holders, electrical conductors and receptacles, to be fixed on the branches to establish tree light strings.
